Project Design Phase

Solution Architecture

Date	15 Feb 2026
Team ID	LTVIP2026TMIDS66206
Project Name	Gemini Pro Financial Decoder: Transforming Complex Data into Actionable Insights
Maximum Marks	4 Marks

Solution Architecture Overview

Solution architecture defines how the proposed system addresses the business problem by mapping user requirements to technical components. It explains the structure, behavior, and interaction of different modules involved in the Gemini Pro Financial Decoder.

The architecture ensures scalability, accuracy, security, and ease of use while transforming complex financial data into actionable insights.
